Summary:

Self-taught Software Developer building applications using React, Node.js and React Native. Experienced in developing ERP, POS, and business applications, along with SaaS and booking platforms. Mainly focused on frontend development while also working with backend APIs, databases, authentication, business logic and Mobile app. Comfortable working with existing codebases, learning new technologies, and collaborating with teams to build and improve real-world applications.

Skills:

JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Node.js, Express.js, NestJS, PostgreSQL, MongoDB, GraphQL, REST API, React Native, Git, GitHub, Docker, Postman, Swagger, Bootstrap, Ant Design

Experience:

Software Developer (Apr 2026 - Nov 2026) - Akij iBos

- Worked on ERP modules including Procurement, Purchase Request, and Purchase Order, building and improving features used in day-to-day business operations.
- Developed a Visitor Management System integrated with ZKTeco turnstile gates, implementing visitor registration, host approval, QR-based access, automated device synchronization, and time-based access expiration.
- Refactored Standard Chartered Bank's Statement Collection system, automating CAMT XML processing, database mapping, duplicate handling, batch processing, and scheduled SFTP retrieval using Quartz, successfully processing 7,051 transactions in testing.

Frontend Developer (Dec 2023 - Jan 2026) - Mediusware Ltd.

- Worked on POS and warehouse management systems, developing sales and sales return pages, inventory and stock management features, and integrating frontend and backend APIs. Added keyboard shortcuts and keyboard-friendly interactions to make the POS workflow faster and easier to use.
- Worked on a drag-and-drop website builder with multi-tenancy, reusable components, and subdomain-based website publishing.
- Integrated GraphQL APIs and handled dynamic data rendering across different pages and modules.
- Built frontend features including profile management, task management, customer orders, and user preferences, with role-based access control on eCommerce projects.
- Worked on an event management application, developing new features and connecting frontend components with backend services.
- Built a flight booking system using Next.js and NestJS, with user authentication, role-based access, and CRUD features for airlines, airports, aircraft, and routes.
- Integrated the Amadeus API for flight search and booking-related data, and developed the frontend booking flow with responsive UI and API integration.

Web Developer (Sep 2022 - Nov 2023) - Freelance & Personal Projects

- Built web applications with React.js while strengthening my frontend development skills, including reusable components, responsive layouts, and user interactions.
- Worked on the frontend of a School Management System and Flight Booking App building pages and features and integrating them with backend APIs.
- Built several practice projects to strengthen my skills in JavaScript, REST APIs, authentication, CRUD operations, Git, and frontend debugging.

Education:

BSc in Mathematics (2019 - Dropout) - Habibullah Bahar University College (National University)
HSC in Science (2017 - 2019) - Kabi Nazrul Govt. College (Science Stream)

Additional Projects:
